

Software Test Plan - Demo Website

1. Release Scope

Included Features

The following functionalities will be covered as part of the current release:

- User Registration
- User Login
- Forgot Password
- Reset Password
- Change Password
- User Profile Management
- Search Functionality
- Logout Functionality
- Field Validations
- Error Message Verification
- Session Management
- Basic Security Validations

Excluded Features

The following functionalities are not part of the current release scope:

- Payment Gateway Integration
- Third-Party API Integrations
- Mobile Application Testing
- Performance Testing
- Load and Stress Testing
- Accessibility Testing
- Localization/Internationalization Testing

2. Test Objectives

The objectives of testing are:

- Verify that all functionalities work according to business requirements.
- Validate input field behavior and business rules.
- Ensure data is saved and retrieved correctly.
- Detect and report defects before production deployment.
- Verify application stability and usability.
- Confirm proper handling of valid and invalid user actions.
- Minimize production risks by identifying critical issues during testing.

3. Test Strategy

Testing Types

Smoke Testing

Verify that the application is stable enough for detailed testing.

Functional Testing

Validate all application functionalities against requirements.

Validation Testing

Verify mandatory fields, format validations, and business rules.

UI Testing

Validate page layout, labels, buttons, links, and field alignment.

Regression Testing

Ensure existing functionalities are not impacted after bug fixes.

Security Testing

Perform basic security validations such as:

- SQL Injection Checks
- Cross-Site Scripting (XSS)
- Password Masking
- Session Validation

Module-wise Testing Approach

Login Module

Validate:

- Successful login using valid credentials
- Invalid username validation
- Invalid password validation
- Empty field validation
- Password masking
- Error message verification

Registration Module

Validate:

- New user registration
- Mandatory field validations
- Email validations
- Password policies
- Duplicate user registration prevention

Forgot Password Module

Validate:

- Registered email acceptance
- Unregistered email rejection
- Password reset link generation

- Password reset workflow

Change Password Module

Validate:

- Existing password verification
- New password validation
- Password confirmation validation

User Profile Module

Validate:

- Profile viewing
- Profile editing
- Data update functionality
- Form validations

Search Module

Validate:

- Search with valid keywords
- Search with invalid keywords
- Empty search validation
- Search result accuracy

Logout Module

Validate:

- Successful logout
- Session termination
- Restricted page access after logout

4. Test Environment and Test Data

Test Environment

Component	Details
Environment	QA/Staging
Operating System	Windows 11
Browser 1	Google Chrome
Browser 2	Microsoft Edge
Browser 3	Mozilla Firefox
Database	Test Database
Test Tool	Excel/Test Management Tool
Defect Tool	JIRA/Bug Tracking Tool

Test Data

Login Data

Valid Data

- [user1@test.com](#) / Password@123
- [user2@test.com](#) / Welcome@123

Invalid Data

- [invalid@test.com](#)
- wrongpassword

Boundary Data

- Minimum email length
- Maximum email length

Security Data

- ' OR 1=1 --
- alert('XSS')

Registration Data

Valid Data

- First Name: John
- Last Name: Smith
- Email: john@test.com
- Password: Welcome@123

Invalid Data

- Invalid email formats
- Password without special characters
- Empty fields

Search Data

Valid Search Terms

- Product
- User
- Test

Invalid Search Terms

- @@@@
-

5. Resource Estimation

Resources Required

QA Engineer

Responsibilities:

- Test Planning
- Test Case Creation
- Test Data Preparation
- Test Execution
- Defect Reporting

QA Lead

Responsibilities:

- Review Test Cases
- Monitor Test Progress
- Prepare Summary Report

Development Team

Responsibilities:

- Analyze defects
- Fix issues
- Support testing activities

Effort Estimation

Activity	Estimated Effort
Test Planning	1 Day
Test Case Design	2 Days
Test Data Preparation	1 Day
Test Execution	3 Days

Retesting	1 Day
Regression Testing	1 Day
Test Closure	1 Day

Total Estimated Effort: **10 Person Days**

6. Test Deliverables

The following documents will be produced:

Planning Documents

- Test Plan
- Test Strategy

Design Documents

- Test Scenarios
- Test Cases
- Test Data Document

Execution Documents

- Daily Status Report
- Defect Report
- Test Execution Report

Closure Documents

- Test Summary Report
- Release Recommendation
- Test Sign-off Document

Traceability Documents

- Requirement Traceability Matrix (RTM)

7. Schedule and Timelines

Week 1

Day 1

- Requirement Analysis
- Test Planning

Day 2

- Test Case Preparation

Day 3

- Test Data Preparation

Day 4

- Test Case Review

Day 5

- Test Case Sign-off

Week 2

Day 6-8

- Test Execution

Day 9

- Defect Reporting

Day 10

- Retesting

Week 3

Day 11-12

- Regression Testing

Day 13

- Execution Report

Day 14

- Test Summary Report

Day 15

- Sign-off

8. Risks and Mitigation Plan

Risk	Impact	Mitigation
Requirement Changes	High	Conduct regular requirement reviews
Environment Downtime	High	Maintain backup environment
Delayed Defect Fixes	Medium	Daily defect triage meetings
Incomplete Requirements	High	Clarification sessions with stakeholders
Insufficient Test Data	Medium	Prepare data before execution
Resource Unavailability	Medium	Cross-training and backup resource planning

9. Entry and Exit Criteria

Entry Criteria

Testing will begin only when:

- Requirements are approved.
- QA environment is available.
- Build is deployed successfully.
- Test data is prepared.
- Test cases are reviewed and approved.

Exit Criteria

Testing will be completed when:

- All planned test cases have been executed.
- No Critical defects remain open.
- No High-Severity defects remain open.
- Regression testing is completed successfully.
- Test Summary Report is approved.

10. Review and Approval

The Test Plan will be reviewed and approved by:

Role	Responsibility
QA Engineer	Prepare Test Plan
QA Lead	Review and Approval
Project Manager	Final Approval
Business Analyst	Requirement Validation
Stakeholders	Business Sign-off
